SOLID HARDWOOD HERRINGBONE FLOORS WITH NO COMPROMISE ON QUALITY

Transform the style and feel of your surroundings with a Junckers Twin Herringbone floor

Wooden floors in geometric patterns hark back to the great classical interiors from ages past- but add real design flair to contemporary and modern spaces too.

Twin Herringbone is inspired by traditional single herringbone floors, but with a unique twist. Junckers offers an exclusive range of colours and finishes to match any budget.

These floors offer even more design choices, and compliment Junckers long established range of herringbone parquet, plank and Hexparket* floors- All different designs, but any of these floors will take the lead in making a stunning interior.

The appeal of a Junckers Twin Herringbone floor comes from it being made from boards that are two strips wide. Each board contains one full

length strip and two half lengths, making a unique pattern which is a delight to the eye.

Floors are installed using the Junckers Glue-Down method. The resulting floor is very quiet to walk upon with a reassuringly solid feel underfoot.

Guaranteed for use with underfloor heating.

OAK

OAK

100 % solid wooden flooring

Twin Herringbone floors are available in a wide range of timbers and finishes, including Beech, Oak and Black Oak.

Each Twin Herringbone plank is 516.6mm long and 129.0mm wide and available in either 14mm or 22mm thickness.

During its life the floor may be sanded and sealed numerous times, giving unbeatable life span and durability.

Harmony, in more than one way

The timber we use is selected to match our Harmony grade floors, therefore our Twin Herringbone boards will have some attractive grain and colour variation between one strip and another.

A choice of surface and finish

All Twin Herringbone floors are available factory-finished with either lacquer or oil, or can be delivered untreated so you can apply your own finish, and there is a wide range of colours to choose from.

BLACK OAK

DELIVERED WITH A HARDWEARING SURFACE

Junckers Twin Herringbone floors are surface-treated in our factory with Ultramatt or Silk Matt lacquer, or oil treated for a very natural look. Factory treatment means that you will have:

- A high quality finish which will be more uniform than one which is site applied.
- A hard wearing factory finish with a consistently high level of durability.
- Faster installation; no need for on-site finishing to be done.
- A cleaner installation; no sanding dust to clear up.
